DATE MAILED: 01/16/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/769,149

Applicant(s)

RATHUS ET AL.

Examiner

Uyen-Chau N. Le

Art Unit

2876

VA

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 December 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 168-263 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 168-263 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____.
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Requesting Continued Examination (RCE)

1. Receipt is acknowledged of the Requesting Continued Examination (RCE) field 18 December 2002.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Claims 168-173, 176-178, 195-196, 220, 229-232, 237-239, 242, 253, 258 and 260-263 are rejected under 35 U.S.C. 103(a) as being unpatentable over Withnall et al (US 4,488,035) in view of Fields (US 4,481,412).

Art Unit: 2876

Re claims 168-173, 176-178, 195-196, 220, 229-232, 237-239, 242, 253, 258 and 260-263: Withnall et al discloses a system for displaying information to a user comprising a printed stationary having at least one machine recognizable feature (i.e., barcode); a feature recognition unit 18 having associated therewith a means for recognizing the machine recognizable feature (col. 4, lines 2-30); display the information on the portable handset illuminated display having a microprocessor with programmable memories (col. 5, lines 10-17).

Withnall et al fails to teach or fairly suggest that the displayed information is programming material and the system further comprising means for transmitting a coded signal in response to the recognition of the machine recognizable feature and an intelligent controller having associated therewith a means for accessing the programming material in response to receiving the coded signal.

Fields teaches the above limitation with an accessing means 10 having a microcontroller 23 including a barcode electronic circuit 25 electrically coupled to the barcode reader 24 for transmitting/accessing the programming material in response to receiving the coded signal (fig. 2; col. 7, line 40 through col. 8, line 11); wherein the displayed data is a video/image/programming/sound/pictorial/electronic/media data and wherein the display 22 is a television/workbook (col. 6, lines 56-64 and col. 8, line 12 through col. 9, line 55).

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Fields into the teachings of Withnall et al in order to provide the user a flexibility in viewing his/her desired/requested information (i.e., video, pictorial, etc.), and thus providing a more user-friendly system. Furthermore, such

Art Unit: 2876

modification would have been an obvious extension as taught by Withnall et al, and therefore an obvious expedient.

5. Claims 174, 175, 180, 181, 183, 189, 190, 192, 193, 214-219 and 222-223 are rejected under 35 U.S.C. 103(a) as being unpatentable over Withnall et al as modified by Fields as applied to claim 168 above, and further in view of Roberts (US 5,324,922) and Malec et al (US 5,287,266). The teachings of Withnall et al as modified by Fields have been discussed above.

Re claims 174, 175, 180, 181, 183, 189, 190, 192, 193, 214-219 and 222-223: Withnall et al/Fields have been discussed above but fails to teach or fairly suggest feature for online/home shopping band the data link comprises a cable television line.

Roberts teaches the above limitation with a home/online shopping system (figs. 1-14; col. 1, lines 58+; col. 7, line 35 through col. 12, line 35).

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Roberts into the teachings of Withnall et al/Fields with a faster internet system due to the benefit of cable television transmitting/conducting communication capability. Furthermore, such modification would have been an obvious extension as taught by Withnall et al/Fields to provide the user an alternative way of conducting the shopping at his/her convenience (i.e., online shopping /at home), and therefore an obvious expedient.

Withnall et al/Fields as modified by Roberts fails to teach or fairly suggest that the data link comprises an ISDN line.

Malec et al teaches the above limitation with the use of ISDN technology (col. 7, lines 1-12).

Art Unit: 2876

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Malec et al into the teachings of Withnall et al/Fields/Roberts in order to provide Withnall et al/Fields/Roberts with the latest technology for a more accurate and faster system due to the benefit of ISDN networking line. Furthermore, such modification would have been an obvious extension as taught by Withnall et al/Fields/Roberts and would have been merely a substitution of equivalent (i.e., to cable television line) well within the ordinary skill in the art, and therefore an obvious expedient.

6. Claims 179, 182, 184, 186-188, 191, 194, 199-201, 203-204, 209-210, 213, 221, 224, 225-226, 227-228, 236, 241, 243-245, 256 and 259 are rejected under 35 U.S.C. 103(a) as being unpatentable over Withnall et al as modified by Fields as applied to claims 168 and 258 above, and further in view of Bravman et al (US 5,401,944). The teachings of Withnall et al as modified by Fields have been discussed above.

Re claims 179, 182, 184, 186-188, 191, 194, 199-201, 203-204, 209-210, 213, 221, 224, 225-228, 236, 241, 243-245, 256 and 259: Withnall et al/Fields have been discussed above but fails to teach or fairly suggest that the display unit comprising a wireless communication device (e.g., a remote unit).

Bravman et al teaches the above limitation with remote units 15 providing all necessary information related to traveling (i.e., seat assignment; airline/hotel/rental cars reservations, etc.) in col. 4, line 21 through col. 14, line 5 and col. 16, line 14 through col. 18, line 22.

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Bravman et al into the teachings of Withnall et al/Fields in order to provide Withnall et al/Fields with the latest technology system (i.e., a

Art Unit: 2876

wireless communication device) and a more compact system wherein the portable handheld communication device can be carried along with the user without causing any inconvenience, and thus providing a more user-friendly system. Furthermore, such modification would have been an obvious extension as taught by Withnall et al/Fields, and therefore an obvious expedient.

7. Claims 197, 202 and 205 are rejected under 35 U.S.C. 103(a) as being unpatentable over Withnall et al as modified by Fields as applied to claim 168 above, and further in view of Anmelder (DT 2,452,202 A1). The teachings of Withnall et al as modified by Fields have been discussed above.

Re claims 197, 202 and 205, Withnall et al/Fields have been discussed above but fails to teach or fairly suggest that at least one machine recognizable feature is invisible.

Anmelder teaches the above limitation with the machine recognizable feature is invisible (see English abstract).

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Anmelder into the teachings of Withnall et al/Fields in order to provide Withnall et al/Fields with a greater security system wherein the data recorded in the machine recognizable feature is invisible to naked eye, and thus preventing an unauthorized individual(s) from manipulating the data. Furthermore, such modification would have been an obvious extension as taught by Withnall et al/Fields, and therefore an obvious expedient.

8. Claims 198 and 212 are rejected under 35 U.S.C. 103(a) as being unpatentable over Withnall et al as modified by Fields as applied to claim 168 above, and further in view of

Art Unit: 2876

Tannehill et al (US 5,158,310). The teachings of Withnall et al as modified by Fields have been discussed above.

Re claims 198 and 212, Withnall et al/Fields have been discussed above but fails to teach or fairly suggest that at least one machine recognizable feature comprises a magnetic code/strip.

Tannehill et al teaches the above limitation with the machine recognizable feature can be a barcode or a magnetic strip (col. 18, lines 7-12).

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Tannehill et al into the teachings of Withnall et al/Fields in order to provide Withnall et al/Fields with an alternative feature for encoding data (i.e., magnetic strip versa barcode), which can be read a convention magnetic strip reader. Furthermore, such modification would have been merely a substitution of equivalents for storing data well within the ordinary skill in the art, and therefore an obvious expedient.

9. Claims 206-208 and 211 are rejected under 35 U.S.C. 103(a) as being unpatentable over Withnall et al as modified by Fields as applied to claim 168 above, and further in view of Schach et al (US 5,397,156) and Anmelder (DT 2,452,202 A1). The teachings of Withnall et al as modified by Fields have been discussed above.

Re claims 206-208 and 211, Withnall et al/Fields have been discussed above but fails to teach or fairly suggest that at least one machine recognizable feature comprises a watermark.

Schach et al teaches the above limitation with a machine recognizable feature 42 comprises a watermark (see abstract).

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Schach et al into the teachings of Withnall et

Art Unit: 2876

al/Fields for its aesthetic purposes. Furthermore, such modification would have been an obvious extension as taught by Withnall et al/Fields, and therefore an obvious expedient.

Withnall et al/Fields as modified by Schach et al fails to teach or fairly suggest that at least one machine recognizable feature comprises an invisible watermark.

Anmelder teaches the above limitation with the machine recognizable feature is invisible (see English abstract).

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Anmelder into the teachings of Withnall et al/Fields/Schach et al in order to provide Withnall et al/Fields/Schach et al with a greater security system wherein the data recorded in the machine recognizable feature is invisible to naked eye, and thus preventing an unauthorized individual(s) from manipulating the data. Furthermore, such modification would have been an obvious extension as taught by Withnall et al/Fields/Schach et al, and therefore an obvious expedient.

10. Claims 185, 233-235, 240, 241, 246-252, 254, 255 and 257 are rejected under 35 U.S.C. 103(a) as being unpatentable over Withnall et al as modified by Fields as applied to claim 168 and 301 above, and further in view of Morales (US 5,872,589). The teachings of Withnall et al as modified by Fields have been discussed above.

Re claims 185, 233-235, 240, 241, 246-252, 254, 255 and 257: Withnall et al/Fields have been discussed above but fails to teach or fairly suggest that the display unit comprises a personal planner/phone/pager.

Morales teaches the above limitation in figs. 2, 5, 8 & 9; col. 3, lines 28 through col. 7, line 12).

Art Unit: 2876

It would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to incorporate the teachings of Morales into the teachings of Withnall et al/Fields in order to provide the user with the flexibility of selecting his/her desired display unit that is most convenient to his/her needs, thus providing a more user-friendly system. Furthermore, such modification would have been an obvious extension as taught by Withnall et al/Fields, and therefore an obvious expedient.

Response to Arguments

11. Applicant's arguments with respect to claims 168-263 have been considered but are moot in view of the new ground(s) of rejection.

Newly cited reference to Withnall et al, Fields, Bravman et al, Anmelder, Tannehill et al, Malec et al, Schach et al, Morales and Roberts have been used in the new grounds of rejection to meet the newly submitted priority date of the application.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patents to Malec et al (US 5,295,064); Mueller et al (US 5,235,509); Burr (US 5,222,624); Metts (US 5,369,571); Von Kohorn (US 5,368,129); Mueller et al (US 5,353,219); Klausner et al (US 4,117,542); Osawa (JP 03,151,263); McCalley et al (US 5,119,188); Sebestyen (US 3,976,995); Hamrick (US 5,451,998) and Schach et al (US 5,397,156) are cited as

Art Unit: 2876

of interest and illustrate a similar structure to a method and apparatus for accessing electronic data via a familiar printed medium.

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Uyen-Chau N. Le whose telephone number is 703-306-5588.

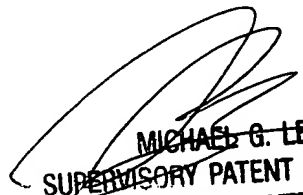

The examiner can normally be reached on M, T, F: 6:00-6:30 and W & TH: 9:00-11:00 .

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MICHAEL G LEE can be reached on (703) 305-3503. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-7722 for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
